Cyanosis is the bluish or purplish discoloration of the skin or mucous membranes due to the tissues near the skin surface having low oxygen saturation. Based on Lundsgaard and Van Slyke's work, it is classically described as occurring if 5.0 g/dL of deoxyhemoglobin or greater is present. This was based on an estimate of capillary saturation based on a mean of arterial versus peripheral venous ...

For a hazard determination to be complete, one must consider all possible hazards, and document any hazards that are identified. While the hazards listed in the HCS represent the majority of potential workplace hazards, the list is not all-inclusive, especially for health hazards.

Guidance for Hazard Determination for Compliance with the ...

Topic Overview What is a fractured rib? A rib fracture is a crack or break in one of the bones of the rib cage. A break in the thick tissue (cartilage) that connects the ribs to the breastbone may also be called a fractured rib, even if the bone itself is not broken. The most common cause of a fractured rib is a direct blow to the chest, often from a car crash or a fall.

Causes of breast pain Cyclical hormonal changes due to menstrual cycle. Breast pain associated with the hormonal changes of the menstrual cycle is usually cyclical in nature and varies with the time of the month. One third of women may, however, have noncyclical pain (not related to the menstrual cycle) which is less responsive to treatment.
