Catalog - Roane State Community College

Health information management (HIM) is information management applied to health and health care. It is the practice of acquiring, analyzing and protecting digital and traditional medical information vital to providing quality patient care. With the widespread computerization of health records, traditional (paper-based) records are being replaced with electronic health records (EHRs).

Health information management - Wikipedia

pMD is the software for physicians that makes charge capture, secure messaging, HIE and care coordination fast, easy and efficient. Read real reviews of pMD mobile software for physicians.
