*Mysql Documentation Create Table - Eventually, you will extremely discover a new experience and achievement by spending more cash. yet when? reach you acknowledge that you require to acquire those all needs similar to having significantly cash? Why don't you try to acquire something basic in the beginning? That's something that will guide you to understand even more not far off from the globe, experience, some places, when history, amusement, and a lot more?*

*It is your totally own mature to perform reviewing habit. among guides you could enjoy now is mysql documentation create table below.*

### MySQL Documentation Create Table

DATA DIRECTORY, INDEX DIRECTORY. For InnoDB, the DATA DIRECTORY='directory' option allows you to create InnoDB file-per-table tablespaces outside the MySQL data directory. Within the directory that you specify, MySQL creates a subdirectory corresponding to the database name, and within that a .ibd file for the table.

### MySQL :: MySQL 5.7 Reference Manual :: 13.1.18 CREATE ...

When you create a MyISAM table, MySQL uses the product of the MAX\_ROWS and AVG\_ROW\_LENGTH options to decide how big the resulting table is. If you don't specify either option, the maximum size for MyISAM data and index files is 256TB by default. (If your operating system does not support files that large, table sizes are constrained by the file size limit.)

### MySQL :: MySQL 8.0 Reference Manual :: 13.1.20 CREATE ...

mysql> CREATE TABLE pet (name VARCHAR(20), owner VARCHAR(20), -> species VARCHAR(20), sex CHAR(1), birth DATE, death DATE); VARCHAR is a good choice for the name, owner, and species columns because the column values vary in length. The lengths in those column definitions need not all be the same, and need not be 20.
