Converting an automatic choke to manual. Most new cars are fitted with an automatic choke rather than a manual one. The choke automatically opens and closes the choke butterfly (or valve) in the carburettor depending on the temperature of the engine.

### **Converting an automatic choke to manual | How a Car Works**

The list number for most performance and factory 2 and 4 barrel carburetors will be found stamped into the upper right hand corner of the airhorn or sometimes called the choke tower. On the 4150 HP models that do not have a choke tower the list number will be stamped into the mainbody behind the throttle linkage.

### **Tech Support - Holley Performance - Holley Performance**

The integral choke is an integral part of the carburetor. The divorced choke resides on the manifold (divorced or remote from the carburetor) and has an operating rod from the choke to the carburetor. In general, carburetors with divorced chokes use a separate choke-pulloff to open the choke. Integral chokes have a piston inside the choke housing.
