Catalog APIs are also available and can be used in direct customization or even to perform searches (among other catalog functions) in custom applications. The API documentation is available here. OIM 11g R2 documentation has a whole chapter dedicated to the catalog. Such documentation is available here.

### **Oracle Fusion Middleware Security: OIM 11g R2 Catalog**

Oracle Identity Manager (OIM) is a powerful tool for organizations to manage accounts across many systems. Because it is such a key piece of the IT puzzle, it becomes critical to have good performance with the product. While Oracle provides some baseline sizing recommendations and other tuning steps, some of the documentation is incomplete and at times contradictory.
