Mathematics (from Greek μάθημα *máthēma*, "knowledge, study, learning") includes the study of such topics as quantity, structure, space, and change.. Mathematicians seek and use patterns to formulate new conjectures; they resolve the truth or falsity of conjectures by mathematical proof. When mathematical structures are good models of real phenomena, then mathematical reasoning can ...

DEFINITIONS "Statistical literacy is the ability to read and interpret summary statistics in the everyday media: in graphs, tables, statements, surveys and studies. Statistical literacy is needed by data consumers – students in non-quantitative majors: majors with no quantitative requirement such as political science, history, English, primary education, communications, music, art and ...

StatLit.Org

Literacy data published by UNESCO displays that since 1950, the adult literacy rate at the world level has increased by 5 percentage points every decade on average, from 55.7 per cent in 1950 to 86.2 per cent in 2015. However, for four decades, the population growth was so rapid that the number of illiterate adults kept increasing, rising from 700 million in 1950 to 878 million in 1990.

Learning, thinking, creating. As we all finish up our winter breaks, it's time to face the harsh reality that not only do we need to head back to class after the new year, but we need January activities for our classroom that will engage our students.

The Teacher Studio - Learning, thinking, creating

I wonder how much longer we will go down the accountability road we're on before politicians, DFE, Ofsted and some of the beneficiaries of the current system realise just how bad things are; before they realise that they themselves are making things worse; before they change tack.
