Oracle Applications Flexfields Guide values of the segment using this value set are not otherwise validated, and they do not have descriptions. Because a None value set is not validated, a segment that uses this value set does not provide a list of values for your users. A segment that uses this value set (that is, a non-validated segment ...

Oracle Applications Flexfields Guide - MAFIADOC.COM

Refer to the Oracle Applications Flexfields Guide (Chapter 4), it was advised not to amend the maximum size of any existing value set especially if they are right-justify and zero-fill. In our case, we must change one of the segment from existing 5 chars to 6 chars and this is an accounting Flexfield (all segments are right justified zero fill.

Key Flexfields - community.oracle.com

Flexfields are most important parts of Oracle Applications because flexfields are so generic in nature and can be used to suit any industry or organization. A flexfield as the name suggests, is a flexible data field that organization can customize to business needs without programming.
