Motor units- consists of one motor neuron and the muscle fibre it stimulates.

Muscular System 3 , Sample of Essays - educheer.com

The Muscular System The muscular system is the body's network of tissues that controls movement both of the body and within it. Walking, running, jumping: all these actions propelling the body through space are possible only because of the contraction (shortening) and relaxation of muscles. These major movements, however, are not the only ones directed by muscular activity.
