Joseph Orlicky, author of the definitive Material Requirements Planning (MRP): The New Way of Life in Production and Inventory Management, said, "Never forecast what you can calculate." Nowhere is this rule more evident than in the manufacturing industry, where determining the right amount of raw material for current demand is a challenge.

The user requirement(s) document (URD) or user requirement(s) specification (URS) is a document usually used in software engineering that specifies what the user expects the software to be able to do.. Once the required information is completely gathered it is documented in a URD, which is meant to spell out exactly what the software must do and becomes part of the contractual agreement.

In product development and process optimization, a requirement is a singular documented physical or functional need that a particular design, product or process aims to satisfy. It is commonly used in a formal sense in engineering design, including for example in systems engineering, software engineering, or enterprise engineering. It is a broad concept that could speak to any necessary (or ...
