The Practical Optimization of Industrial Processes is closely linked to the subject of BPM. But before we can delve deeper into this issue, it is important to define what exactly we mean by the practical optimization of industrial processes:. Read about a Process Optimization example here.. The practical optimization of industrial processes is the organization of effort directed to ensure:

The Practical Optimization of Industrial Processes

Hydrocracking is a petroleum refining process where cracking occurs simultaneously with hydrogenation to convert heavy petroleum feedstocks into desired lighter products. In this study, multi-objective optimization of an industrial hydrocracking unit has been performed for the first time, to find scope for further improvements and to provide a range of optimal solutions.
