*Obstetric Triage Guidelines - When somebody should go to the books stores, search initiation by shop, shelf by shelf, it is in reality problematic. This is why we give the books compilations in this website. It will categorically ease you to see guide obstetric triage guidelines as you such as.*

*By searching the title, publisher, or authors of guide you in fact want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be every best place within net connections. If you aspire to download and install the obstetric triage guidelines, it is completely easy then, since currently we extend the partner to buy and make bargains to download and install obstetric triage guidelines correspondingly simple!*

**Obstetric Triage Guidelines**

Hospital-Based Triage of Obstetric Patients. ABSTRACT: Emergency departments typically have structured triage guidelines for health care providers encountering the diverse cases that may present to their units. Such guidelines aid in determining which patients must be evaluated promptly and which may wait safely, and aid in determining anticipated use of resources.

The Obstetrical Triage Acuity Scale (OTAS) has been designed to establish a national standard that allows departments providing obstetrical assessment to evaluate acuity level and set guidelines for timely care. All patients presenting to the obstetrical triage area are triaged and prioritized according to the OTAS tool.

**OBSTETRICAL TRIAGE ACUITY SCALE (OTAS) Guideline HCS-207-01**

The Association of Women's Health, Obstetric and Neonatal Nurses (AWHONN) used AHRQ's Emergency Severity Index (ESI) to inform development of a tool used to triage obstetric patients. The ESI classifies patients into five categories according to the severity of their conditions and the resources needed for treatment.

**AHRQ's Emergency Severity Index Used to Inform Development ...**

No standardised system of triage exists in Maternity Care and local audit identified this to be problematic. We designed, implemented and evaluated an Obstetric Triage System in a large UK maternity unit. This includes a standard clinical triage assessment by a midwife, within 15 min of attendance, leading to assignment to a category of clinical urgency (on a 4-category scale).
