Obiee 11g Installation Guide

What is report bursting? Rather than giving a definition, think of what it does as explained below and build up the definition yourself. Using BI Publisher's bursting feature you can split a single report based on a key in the report data and deliver the report based on a second key in the report data.

BI Publisher Report Bursting | OBIEE Step by Step Guide

Are you managing an OAC or OBIEE instance and your life is nice and easy since you feel like having everything in control: your users browse existing dashboards, create content via Analysis, Data Visualization or SmartView and deliver data via Agents or download dashboard content to use in Excel.

JavaScript is a powerful tool that can be used to add functionality to OBIEE dashboards. However, for many whose wheelhouses are more naturally aligned with Stephen Few rather than John Resig, adding JavaScript to a dashboard can be intimidating. To facilitate this process, steps can be taken to centralize and simplify the invocation of this code.

Introduction. SAML is a way to convey identity information across systems. It is an industry-accepted standard and especially interesting when you need to propagate user information between different security domains, because it can overcome the HTTP cookie limitations in cross-domain scenarios (although there are ways to solve that with OAM today) and implement the concept of transient ...

Integrating OBIEE 11g into Weblogic's SAML SSO

The diagram above shows OBIEE application layer architecture. The Oracle application layer or popularly known as the Fusion Middleware layer is built upon a common domain-based architecture that can support as a set of common core functionality (like security, scalability etc) across various Oracle products.

But again I faced the same issue saying the status string is INVALID. So I manually updated the status string of ATGLITE schema to VALID in schema_version_registry and then the examine was successful and it allowed me to proceed. Actually what has happened was; initially when the psa has performed the check it could not connect to the database and set the status string as INVALID, which was ...
