Mountain Bike Frame Materials. The frame influences a bike's weight, strength, longevity, ride quality and price. Aluminum alloy is the most commonly used material for mountain bike frames. Some more-expensive models have lighter aluminum frames as a result of the manufacturer expending more dollars and effort in the selection of materials, tubing design and the manufacturing process.

I've seen many bike reviews saying that people have changed their road bike to hybrid bike to ride everywhere. However, one needs to understand that it isn't as fast on the tarmac as the road bike is and not as comfortable on the forest as the mountain bike. Same goes for comfort level - between road and mountain bike.
