OpenEMR Users Guide Based on Version 3.1.0 ... In your browser's address bar you will need to enter the location of your OpenEMR installation. For most users this address will consist of the name of your server followed by a forward leaning slash, "openemr" and another

**OpenEMR Users Guide**

I figured that if I can barely understand it after 3 readings, most users would find it equally difficult. Hence the 4th guide was written in a linear fashion. Apparently I neglected to add it to each of the individual Users Guides. The 4.1.3 guide was placed on top of 4.1.2 to preserve the inverse order of the grouping.

The Access Control Objects (ACOs) for OpenEMR have a very specific structure. This is described in the file library/acl.inc, which you must also modify in order to enable use of phpGACL. You must manually create an ARO in this "users" section for each OpenEMR user (except for the "admin" user which the setup program creates).

Disclaimer: This 'howto' manual is written based on my personal experience while trying to implement OpenEMR in my clinic. I use Windows XP as a platform of trial and transform my Windows XP to become a local server using XAMPP. Okay, before we go through the details on the 'how to', I just would like to recap on what is OpenEMR and XAMPP.
