Nagios Core Manuals - Nagios Library

NRPE (Nagios Remote PluginExecutor) est un "Addons" pour Nagios qui permet d'exécuter des greffons (plugins) sur un serveur (Linux/Unix ou Windows) distant. Cela permet de surveiller des ressources locales (charge du processeur, utilisation de la mémoire, espace disque...) qui ne sont normalement pas disponibles depuis d'autres machines.

NRPE — Wikipédia

Plugin Output for Nagios. You should always print something to STDOUT that tells if the service is working or why it is failing. Try to keep the output short - probably less than 80 characters.

Development Guidelines · Nagios Plugins

Fully Automated Nagios. The purpose of FAN is to provide a quick and easy installation which includes the most-used tools in the Nagios community.

An Introduction to Monitoring with Nagios

Nagios (anciennement appelé Netsaint) est une application permettant la surveillance système et réseau. Elle surveille les hôtes et services spécifiés, alertant lorsque les systèmes ont des dysfonctionnements et quand ils repassent en fonctionnement normal.

Nagios — Wikipédia

At the moment there seems to be no Performance Monitor counter available in Windows to show the UDP connection count. Although the Windows Performance Monitor is an easy choice to have a quick glance at how many TCP connections are currently active, it is not an optimal tool to use for debugging or alerting.

Monitoring Windows Network Connections - OutsideIT

Nagios ist eine Software zum Monitoring komplexer IT-Infrastrukturen.. Nagios bietet dazu eine Sammlung von Modulen zur Überwachung von Netzwerken, Hosts und speziellen Diensten sowie eine Web-Schnittstelle zum Abfragen der gesammelten Daten. Es steht unter der GNU GPL, ist also freie Software und läuft unter zahlreichen Unix-ähnlichen Betriebssystemen. . Nagios und das Nagios-Logo sind in ...

cwRsync is a packaging of Rsync for Windows with a client GUI. You can use cwRsync for fast remote file backup and synchronization. Rsync uses the Rsync algorithm which provides a very fast method for bringing remote files into sync. It does this by sending just the differences in the files across the link, without requiring that both sets of files are present at one of the ends of the link ...
