The red maple tree is a quickly growing tree that can reach heights of 40 to 75 feet at maturity. The tree produces flowers and fruit with vibrant colors of red and orange variations. The foliage is a rich green with pale green underside. This statuesque tree develops an oval width between 25 and 45 feet and thrives ...

How to Plant Red Maple Trees | Garden Guides

Plant far enough away from buildings and walls. Your young tree may be pretty small right now, but it will soon grow and it should have enough space around it to develop properly. You should allow at least 6 feet from buildings and for trees that will grow larger 12 or 15 feet may not be too much. Look up and don't plant under utility lines.

Planting a Red Maple

1. Silver maple (*Acer saccharinum*) Big, fast-growing, and a dandy shade tree, silver maple is widespread in eastern states and the Midwest. Unfortunately, the speed at which the tree grows makes for weak, brittle wood that may break during severe storms. The shallow root system invades sewage pipes and drain fields, and is notorious for cracking driveways and walkways.
