**Neuroethics Journal**

Neuroethics is a forum for interdisciplinary studies in neuroethics and related issues in the sciences of the mind. The focus is on ethical issues posed by new technologies developed via neuroscience, such as psycho-pharmaceuticals and other ways of intervening in the mind; the practice of neuroscience itself, including problems posed by incidental findings in imaging work on research subjects ...

**Neuroethics - Springer**

Neuroethics is an international, peer-reviewed journal dedicated to academic articles on the ethical, legal, political, social and philosophical questions provoked by research in the contemporary sciences of the mind and brain; especially, but not only, neuroscience, psychiatry and psychology. The journal publishes articles on questions raised ...

**Neuroethics - incl. option to publish open access**

Neuroethics is a triannual peer-reviewed journal with a focus on interdisciplinary studies in neuroethics and related issues in the sciences of the mind. In the opening editorial, inaugural editor Neil Levy described the journal as focusing on both "ethical reflection on new technologies and techniques produced by neuroscience (and other sciences of the mind)" and "the ways in which the new ...

**Neuroethics (journal) - Wikipedia**

The Journal of Cognition and Neuroethics is committed to presenting wide-ranging discussions. Journal of Neuroscience | December 12, 2018. As the NIH BRAIN Initiative continues to grow and increase our understanding of the human brain and how it functions, it should increasingly rely on a robust neuroethics infrastructure to identify and address neuroethical implications of the research it funds.

**Neuroethics - dana.org**

By Neil Levy Neuroethics is exciting. It is fascinating to consider the deep issues it raises and the future possibilities it explores. I worry, however, that the focus on the exciting possibilities of present and future neuroscience obscures more pressing ethical issues.

**The Neuroethics Blog**

Experiencing hallucinations is one of the most sure-fire ways to be labeled with one of the most derogatory of words: “crazy.” Hearing voices that no one else can hear is a popular laugh line (look no further than Phoebe in *Friends*), but it can be a serious and distressing symptom of schizophrenia and other incapacitating disorders. Anderson Cooper demonstrated the seriousness of the issue ...
