Specifying the research question is the methodological point of departure of scholarly research in both the natural and social sciences. The research will answer the question posed. At an undergraduate level, the answer to the research question is the thesis statement. The answer to a research question will help address a "research problem" which is a problem "readers think is worth solving".

Volume 6, No. 2, Art. 43 – May 2005 . Participant Observation as a Data Collection Method. Barbara B. Kawulich. Abstract: Observation, particularly participant observation, has been used in a variety of disciplines as a tool for collecting data about people, processes, and cultures in qualitative research. This paper provides a look at various definitions of participant observation, the ...

Participant Observation as a Data Collection Method ...

The Argument for and Against the Case Study Research Design. Some argue that because a case study is such a narrow field that its results cannot be extrapolated to fit an entire question and that they show only one narrow example. On the other hand, it is argued that a case study provides more realistic responses than a purely statistical survey.
