Think of a document retention policy simply as a document management policy. It is unwieldy and unrealistic, as well as unnecessary to think that a nonprofit will keep every document it generates. Normally it is fine to clean up your desk by tossing out papers here and there, but when one staff person presses delete on a key document, and that document is needed later -- or if

Home - IT Network

A computer network is a digital telecommunications network which allows nodes to share resources. In computer networks, computing devices exchange data with each other using connections between nodes. These data links are established over cable media such as wires or optic cables, or wireless media such as Wi-Fi.. Network computer devices that originate, route and terminate the data are called ...
