Ocimf Guidelines Mooring

This fourth edition of Effective Mooring is aligned with the guidance in OCIMF's Mooring Equipment Guidelines, Fourth Edition (MEG4), which contains more detailed technical information on the design and maintenance of mooring systems. New in Effective Mooring, Fourth Edition: Emphasis on the whole mooring crew being responsible for safety.

Effective Mooring, Fourth Edition - OCIMF

wire mooring lines, the elasticity of the tails introduces energy that can significantly increase the snap-back hazard. Elongation is proportional to the length of the tail. The fitting of longer synthetic tails, e.g. 22m tails from 11m tails, proportionally increases the stored energy and the amount of snap-back that can be expected.

OCIMF - Mooring Equipment Guidelines (MEG) - ICS

The Oil Companies International Marine Forum (OCIMF) has introduced new guidelines for the safe mooring of tankers and gas carriers at terminals. A Mooring System Management Plan (MSMP) is part of the requirements to ensure risks are managed through the safe design and operation of mooring systems. Learn more about the MSMP in this technical news.
