Space: TimesTen In-Memory Database | Oracle Community

TimesTen Classic 1 is a memory-optimized relational database that provides applications with extremely fast response time and very high throughput as required by many applications in a wide range of industries.

TimesTen In-Memory Database Overview - oracle.com

Yes, the Oracle TimesTen In-Memory Database (TimesTen) is used by many customers today as a standalone database at the application tier. TimesTen provides full transactional support for SQL operations and the transaction logs are persisted to disk for recovery (the database is always in memory).

TimesTen In-Memory Database FAQ - oracle.com

In order to use the 'Oracle TimesTen Application-Tier Database Cache' feature in any databases created within this installation, you must set a value for the TNS_ADMIN environment variable.

Step by Step Oracle TimesTen In-Memory Database ...

Oracle or TimesTen database tables to various formats including the TimesTen ttBulkCp format; and import data to TimesTen tables. Support for Cache Groups and Cache Tables SQL Developer automates the tasks required to configure and create TimesTen tables to cache Oracle Database tables.

Oracle TimesTen In-Memory Database

Oracle TimesTen In-Memory Database (TimesTen) is a relational database that is memory-optimized for fast response and throughput. The database resides entirely in memory at runtime and is persisted to disk storage for the ability to recover and restart. Replication features allow high availability.

Oracle® TimesTen In-Memory Database

The Oracle TimesTen In-Memory Database provides application-tier database and transaction management built on a memory-optimized architecture accessed through industry-standard interfaces. Optional data replication and Oracle caching extend the product to enable multi-node and multi-tier configurations that exploit the full performance ...

Oracle TimesTen In-Memory Database Documentation

Oracle TimesTen In-Memory Database 18 c Release 1 NEW. Note: The initial release (18.1.1) supports only TimesTen Scaleout. TimesTen Classic support, including Application-Tier Database Cache, will be reintroduced soon in an upcoming patchset. - See the Release Notes and Prerequisites for system requirements. - See the complete product documentation for Release 18.1.

Oracle TimesTen Software Downloads

TimesTen is an in-memory, relational database management system with persistence and recoverability. Originally designed and implemented at Hewlett-Packard labs in Palo Alto, California, TimesTen spun out into a separate startup in 1996 and was acquired by Oracle Corporation in 2005. All data within a TimesTen database is located in physical memory, which means that no data operation requires disk I/O. This is unlike traditional disk-optimized relational databases such as the

Oracle Database, DB

TimesTen - Wikipedia
Oracle In-Memory Database Cache is built using Oracle TimesTen In-Memory Database (TimesTen) and is deployed in the application tier for multi-user and multi-threaded applications. Applications connect to the cache database and access the cached tables using standard SQL via JDBC, ODBC, ADO.NET, Oracle Call Interface (OCI), Pro*C/C++, and Oracle PL/SQL programming interfaces.

In-Memory Database Cache Overview - oracle.com
Oracle TimesTen In-Memory Database is a high-performance, in-memory data manager that supports the ODBC (Open DataBase Connectivity) and JDBC (Java DataBase Connectivity) interfaces. The TimesTen CD contains a readme.html file that holds the release notes. These notes list product information and late changes to the printed documentation.
