Using Oracle Application Server Configuration Files
Oracle Application Server 10g is an integrated, standards-based software platform that allows organizations of all sizes to be more responsive to changing business requirements. It provides all the middleware services you need to deploy and manage applications and Web services, deliver personalized applications through enterprise portals and mobile devices, provide real-time business ...

Oracle Application Server 10g Product Center
We are trying to plan our Oracle 10g Portal configuration. We have a 2 node Oracle 10g RAC database at the backend and 2 application servers in the middle tier hosting the Portal software. We were planning to install the Oracle Metadata repository in the existing RAC database (using Repository Creation Assistant) and install the Identity Management Services on each of the two application servers.
