Maple Systems HMCs merge the functionality of both an HMI and a PLC into one cohesive unit, eliminating the need for a separate HMI and PLC. Documentation Untitled Page

Maple Systems | HMC3000 Series | 7" | Documentation

For that reason, it is good programming practice to have Maple "restart" itself at the beginning of each worksheet. To give Maple a command, first tell Maple you are ready to issue commands by selecting Insert-Execution Group-After Cursor. This will start a new bracket (black lines at the left of the worksheet) and give you a prompt (red >).
