JavaScript is a powerful tool that can be used to add functionality to OBIEE dashboards. However, for many whose wheelhouses are more naturally aligned with Stephen Few rather than John Resig, adding JavaScript to a dashboard can be intimidating.To facilitate this process, steps can be taken to centralize and simplify the invocation of this code.

Introduction. SAML is a way to convey identity information across systems. It is an industry-accepted standard and especially interesting when you need to propagate user information between different security domains, because it can overcome the HTTP cookie limitations in cross-domain scenarios (although there are ways to solve that with OAM today) and implement the concept of transient ...
