Documentation for OpenERP.com

Concepts¶ Database ID The primary key of a record in a PostgreSQL table (or a virtual version thereof), usually varies from one database to the next.

OpenERP Server Developers Documentation

By default, OpenERP will never use a view that is not defined for your object. If you have two models, with the same fields, but a different model name, OpenERP will never use the view of one for the other, even if one model inherit an other. You can force this by manually specifying the view, either in the action or in the context.

Views and Events — OpenERP Server Developers Documentation ...

context.Views and Events — OpenERP Server Developers Documentation ... OpenERP is an HTTP web server and may also be deployed as an WSGI-compliant application. Clients may communicate with OpenERP using sessionless XML-RPC, the recommended way to interoperate with OpenERP.

openerp documentation FEEBD64928772874F5C36F98060B3EEF ...

OpenERP documentation uses RST [1] format, which is rendered as HTML or PDF using Sphinx [2]. Build scripts are provided in the documentation tree to easily contribute and manage translations, and to produce the various outputs.

OpenERP Documentation in Launchpad

OpenERP is an HTTP web server and may also be deployed as an WSGI-compliant application. Clients may communicate with OpenERP using sessionless XML-RPC, the recommended way to interoperate with OpenERP. Web-based clients communicates using the session aware JSON-RPC.

Architecture — OpenERP Server Developers Documentation 7 ...

The OpenERP search view really is a sub-view, used in support of views acting on collections of records (list view or graph view, for instance). Its main goal is to collect information from its widgets (themselves collecting information from the users) and make those available to the rest of the client.

OpenERP Web Core and standard addons
