With DBAmp, you can easily access your Salesforce objects using SQL Select, Update, Insert and Delete statements. Use SQL to select and modify objects in Salesforce.com without any additional programming.Run reports that join local tables with Salesforce.com Write complex stored procedures for bidirectional integration from SQL Server to Salesforce.

DBAmp - Salesforce to SQL Server Integration

This document contains information and flowcharts to describe the installation process depending on your system's existing configuration. Some information about common installation tasks, Oracle Fusion Middleware concepts, and silent installation are also provided.

Oracle Fusion Middleware Online Documentation Library

OMPL, the Open Motion Planning Library, consists of many state-of-the-art sampling-based motion planning algorithms.OMPL itself does not contain any code related to, e.g., collision checking or visualization. This is a deliberate design choice, so that OMPL is not tied to a particular collision checker or visualization front end.
