Hibernate. Everything data. - Hibernate
a related question. we have a parent/child relationship set up between class A and class B. class B has a back-pointer to it's parent – parentA. the mapping for the property in Class B looks like this (sorry for the formatting)...

How To: NHibernate Parent/Child Relationships | Dusty Reagan
This did not make any difference either, but thanks anyway. What is interesting is that when the query is first executed NHibernate does not even query the UserPublication table.
