Oracle Clustering Guide - transformances.net

Clustering Concept Guide. Clustering is a necessary aspect of matching, required to produce fast match results by creating intelligent 'first cuts' through data sets, in order that the matching processors do not attempt to compare every single record in a table with every single other record - a process that would not be feasible in terms of system performance.

Solaris cluster basics | Oracle Community

--The Oracle product you need to support clusters for high availability and scalability is Oracle Parallel Server (OPS). Unfortunately, the Linux Oracle8i documentation states that OPS is not yet available for Linux. You could use a hot standby database as Freddy suggested, but this does not require a clustered environment. Oracle 8i (8.1.5) allows a hot standby database to be temporarily ...

Oracle on Linux and Clustering | Oracle Community

The clustering factor is a measure of the ordered-ness of an index in comparison to the table that it is based on. It is used to check the cost of a table lookup following an index access (multiplying the clustering factor by index's selectivity gives you the cost of the operation).

Impact of Clustering Factor on SQL Statements in Oracle 11g
